

A Kindred Success Story

Dedicated to Hope, Healing and Recovery

Linda: Ready for Disney World

After having major surgery, Linda was unable to be weaned post-op from the ventilator. She spent five weeks at a local acute care hospital. Linda was transferred to Kindred Hospital Louisville on November 24 for ventilator weaning, medical management and rehabilitation.

At Kindred Hospital Louisville, Linda's course of care enabled optimization of her cardiovascular status, weaning from the ventilator, and having her trach removed. She was discharged home January 9.

A few months later Linda returned to see the staff at Kindred. "I wanted the staff to know how much I appreciate all their care and hard work while I was at Kindred," she said. From the front desk clerk, to the unit, to the rehab department the staff was moved to tears, smiles and laughter when she told them how

much she appreciated all that they had done for her and that she would be more than happy to talk about Kindred to prospective families and patients.

Today she is able to enjoy spending time with her family and the light of her life, her nine-year-old grandson. She is looking forward to their yearly family vacation at Disney World.

Kindred Healthcare Ranked First Among Health Care: Medical Facilities in *Fortune Magazine's* List of Most Admired Companies. For more information about Kindred Hospital Louisville, please call us at 502.587.7001 or visit us at www.kindredlouisville.com.
